A CHINESE  
OTHELLODetails of Strange  
Tragedy in  
Hilo.JEALOUSY LEADS  
TO BLOODSHEDJudge Lyman's Cook Throws  
Away His Money and Ham-  
mers His Wife's Head.

The Hilo Herald has the following:

A Chinese employed by Judge Lyman  
as cook and general factotum is in jail  
charge with the attempted murder of  
his wife, a young half-caste Portu-  
guese.

It seems that they were married a  
short time ago, the girl being under age.  
After the marriage a former lover of  
the girl who had been absent from town  
returned and her love went out to him.

About this time a suit to annul the mar-  
riage was begun and the Chinese de-  
fended it and won the case. The girl  
then had a conference with her parents  
and under instructions from them re-  
fused to occupy the same apartments  
with her liege. The man brooded over  
it and finally decided to kill his wife  
and put an end to himself.

After mature deliberation and writing  
a letter recounting the cause which  
led up to the difficulty he tied up money  
in his possession amounting to \$250  
and threw it into the river in the vic-  
inity of Pitman street bridge.

Returning to his house on the Lyman  
premises he found his wife on the floor  
asleep. With a heavy hammer he dealt  
her four blows on the head. After  
committing the crime it was his inten-  
tion to take a dose of opium and re-  
lieve himself of worldly responsibility.

Then it occurred to him that in that  
case the circumstances might not reach  
the police department in correct shape,  
so he decided to go to the jail and re-  
port the case in person and tell them  
how it happened. Officers were dis-  
patched to the house and the injured  
girl taken to the hospital, where she  
still lies in a precarious condition. The  
Chinese had been in the employ of  
Judge Lyman for several years and was  
highly trusted.

JUNIORS WON  
BY A MISHAPDefeated Champions on Sat-  
urday—A Memorable Smok-  
ing Concert.

To settle a dispute, and incidentally,  
to earn a dinner, the senior and junior  
crews of the Healan Yacht and Boat  
Club raced last Saturday afternoon  
from the Railroad to the Quarantine  
wharf. The make-up of the boats was  
as follows:

Seniors—Paul Jarrett, stroke; Dan  
Ransom, No. 3; F. B. Damon, No. 2;  
S. A. Walker, bow; C. Reynolds, cox-  
swain.

Juniors—A. W. Webster, stroke; Clif-  
ton Tracy, No. 3; Harry Murray, No. 2;  
A. M. Walcott, bow; L. Conklin, cox-  
swain.

It was thought that the seniors  
would come home alone, but the fates  
ordained differently.

The crews kept well together until  
the Likelike wharf was reached, when  
the seniors let out a link, and soon  
had a good half length the best of  
the argument. Not far from the Like-  
like wharf a seat in the senior shell  
"sprung a tendon," and from then on  
it was all off with the old 'uns.

On seeing their opponents in difficul-  
ties, the juniors got a move on and  
were soon an open length to the good.  
Presently, however, pilikia overtook  
the juniors in the shape of an oar  
which threatened to collapse, and the  
young men were obliged to persevere  
to some extent evened mat-  
ters up, but the handicap of the brok-  
en slide was too great, and despite the  
large exertions of the champions, the  
juniors won the dash by about four  
yards.

In the evening the Healan and their  
friends gathered at the bathhouse  
to review their recent battles through  
clouds of fragrant tobacco smoke.

A feature of the evening was the  
presentation to F. W. Klebahn, who  
has been connected with the club for  
several years, of a gold watch and  
fob. A. L. C. Atkinson was also the  
recipient of a gold watch, and James  
Lloyd, coach of the junior crew, was  
tendered a handsome fob.

After the giving of gifts, an infor-  
mal program was gone through with,  
and refreshments were partaken of.  
Notable among those who amused  
were Messrs. Mariner, Dougherty and  
Herrick. The decorations of the rooms  
and lanais, which were planned in ac-  
cordance with what the society re-  
porter would style a banana scheme,  
were arranged under the supervision  
of T. R. Weaver.

Next Saturday a friendly race be-  
tween the Healan junior and senior  
crews, and the Myrtle senior crew, is  
talked of.

AN INTERESTING STANDARD.

"What is your idea of a man of  
honor?"

"A man of honor," said the French  
nobleman, throwing out his chest, "is  
one who will pay his wine bills and  
card debts, even if he has to marry in  
order to get the money."

DIAMOND HEAD WAS MADE IN  
LESS THAN ONE HOUR'S TIME

There was quite a party gathered on  
the western slope of Diamond Head  
crater Saturday afternoon to listen to  
a talk by Dr. Sereno E. Bishop on the  
eruption and formation of the crater.  
The subject matter gave rise to many  
questions which were ably answered by  
Dr. Bishop. Among those present were:  
Mrs. Jonathan Shaw, E. Bishop King,  
Mrs. Bettis, Mrs. Goudin, Miss Johnson,  
Miss Paulding, Miss Ruth C. Shaw,  
Miss Dorothy E. True, Miss Margaret  
F. Shaw, Miss Jessie C. Shaw, Miss  
Lulu Law, Miss May Frasher, Mr. C.  
H. Dickey, C. F. True, Judge Lyle  
Dickey, Mr. Law, L. J. Frasher and  
Rev. Mr. Hartley.

Dr. Bishop spoke in part as follows:  
DR. BISHOP'S ADDRESS.

I suppose that you wish to hear some  
account of how this singular crater of  
Diamond Head was formed. It is prop-  
erly a tuff-cone, being composed not of  
lava, like the main mountain mass in-  
land, but of this soft brown rock called  
tuff.

Volcanic eruptions may be distin-  
guished into two classes, the effusive  
and the explosive. In the former the mol-  
ten rock is poured out and covers the  
mountain slopes with great floods. If  
you look up at the sides of yonder ra-  
vines, which the rainstorms of many  
hundred thousands of years have worn  
out of the original dome-shaped moun-  
tain, you will see the black edges of  
the ancient lava streams lying in lay-  
ers.

The tuff-cones are entirely different,  
and are produced by very brief and sud-  
den explosive eruptions. The tuff was  
violently shot high aloft into the air in  
the form of superheated mud. This hot  
mud cooled and thickened by the ex-  
pansion of its water and its partial es-  
cape as steam, before reaching the  
ground. It hardened and cemented as  
it fell, though still liquid enough to  
form in thin layers or laminations as  
we see it lying around us at the base  
of the hill.

Several of these tuff-cones in this vic-  
inity are of very recent formation, be-  
ing only from five to forty thousand  
years old, although the great mountain  
masses of this island are probably a  
million years old or more. Those an-  
cient volcanic masses had long ages ago  
grown up by lava flows, had become  
dead volcanoes, had been eaten and  
weathered away by the rainstorms of  
a million years, and had gradually sunk  
by their own weight thousands of feet  
below their original level into the sea.

Then, at a recent period, the long re-  
pose of the earth's crust below them  
became disturbed anew. This distur-  
bance was very likely connected with  
the glacial period, and the weighting down  
of portions of the earth by deep con-  
tinents of ice.

But, whatever the cause, fissures seem  
to have been formed in the crust of the  
earth, along these shores, through  
which the sea waters penetrated to the  
white-hot magma or lava lying twenty-  
five or thirty miles below us. The wa-  
ter and lava became commingled into  
a fiery paste or mud. Finally the in-  
creasing pressure of the steam gener-  
ated found vent through some fissure.

A gigantic explosion ensued near where  
we stand, which was then in the sea,  
outside of the shore of the island. A  
fountain of mud was shot aloft to a  
height, probably, of three miles, and  
in a brief space of time piled up this  
cone.

Other tuff-cones stand near us. Yon-  
der a few miles to the east lies the  
broad and massive Koko, and a little  
northeast the great cone of Koko lipo.

Not only coral but quantities of an-  
cient lava rock were also torn from  
the sides of the vent. You will doubt-  
less find blocks of black and vesicular  
lava embedded in the tuff, which are  
thus accounted for. At Moanalua enor-  
mous masses of pebbles and boulders  
are to be seen, which were ejected from  
Salt Lake crater, a mile away. They  
were torn from ancient pebble beaches,  
now sunk thousands of feet below.

A quite simple calculation may show  
that less than an hour at most was oc-  
cupied in the building of Diamond  
Head. A velocity of not less than 1000 feet  
in a second would suffice to eject the  
tuff-fountain to the necessary height of  
two or three miles. The vent must have  
had a sectional area of more than 5,000  
square feet (note the size of the Punch-  
bowl vent). Therefore five million cubic  
feet of tuff were ejected every second,  
or 300,000,000 cubic feet in a minute. But  
the entire mass of Diamond Head but  
could not have exceeded twelve billions  
or 12,000,000,000 cubic feet. This would  
allow only forty minutes for the ejection  
of the entire mass. It is probable, how-  
ever, that the vent was several times  
as large as the 5,000 square feet allow-  
ed, and the time of ejection proportion-  
ally shorter. I do not believe that the  
whole job took twenty minutes.

The "Argonaut" sneers at Hawaii as  
a group of "volcanic pustules." These  
tuff-cones are a sort of volcanic pus-  
tules.

KEIKES, NOT  
PAPOOSESSubject of Grace Hudson's Brush  
for Some Time to  
Come.

The San Francisco Chronicle con-  
tains the following notice of Grace  
Hudson, the painter of children, who  
is in Hilo, making a study of native  
child life from the point of view of an  
artist:

It may be many a day before Grace  
Hudson will again paint a papoose.  
She went to Honolulu some three  
months ago, and has decided to remain  
there indefinitely. Her brush is busy  
with the Hawaiian, Japanese and Chi-  
nese children of Honolulu's cosmopolitan  
population. Mrs. Hudson will not  
confine herself to the metropolis of the  
Hawaiian Islands; in fact, she left for  
Hilo on June 18th. There she will open  
her studio and get to work in earnest.  
Plenty of materials will be at hand.  
Mrs. Hudson finds that she has no  
end of preliminary work before she can  
get a model for her pictures of little  
savages. She says that when she  
painted the little red babies among the  
Ukiah Indians she used to kidnap  
them. In the Islands, she asserts, she  
can get the children. That is not the  
trouble. They will sit once and promise  
to come again, but do not. The fee  
for a model is not enticing in the land  
where nature keeps the ladder full all  
the time. At Hilo Mrs. Hudson expects  
to live with her "material" and paint  
them in their homes, or coax them in-  
to her apartments. She went to Ho-  
lulu en route to Samoa and Tahiti,  
but acknowledges that she has come  
under the spell of the "dolce far ni-  
ente," and the Islands in the southern  
seas will be seen by her some day.  
Mrs. Hudson will probably send some  
of her first work in this new field to  
this city, and it will be awaited with  
interest.

CAUSES OF THE  
CANEFIELD FIREThe Hamakua Blaze Started by  
the Carelessness of a  
Native.

Hamakua has been visited by a cost-  
ly fire through the carelessness of a  
native taro grower. The man was  
planting cane mauka of the Kukaia  
plantation and had occasion to  
burn off some brush. The fire soon  
spread to a large field of cane belong-  
ing to the Horners, and before it could be  
extinguished was communicated to the  
Ookala fields. About 115 acres were de-  
stroyed at Kukaia and 180 at Ookala,  
the loss in money value approximating  
\$50,000.

George McKubbin, a luna, who was  
fighting the fire, met with a peculiar  
accident. When he came out from the  
burning cane one side of his mouth  
was drawn up almost to his eye. He  
was sent to Honolulu for treatment.

The fire continued to burn and was  
raging up to the hour of going to press  
last night. Manager Gibb of Paauhau  
went over yesterday and offered assist-  
ance in fighting the flames. Albert Hor-  
ner is in the field and is directing the  
men in trying to keep the fire from  
getting into adjacent fields. The con-  
tinued drought has made the cane so  
dry that it is as inflammable as oil.

## Another Honolulu House.

A new commission house under the  
firm name of Wolters, Waldron Co.,  
Ltd., has been established at Honolulu,  
the officers being W. Wolters, president;  
W. G. Cooper, vice president; F. L. Wal-  
dron, treasurer; C. Girdler, secretary;  
C. Bolte, auditor. Mr. Wolters was  
for many years a member of the firm  
of H. Hackfeld & Co., Ltd., and Mr.  
Waldron was in charge of and practi-  
cally built up the grocery department  
of Theo. H. Davies & Co. The third  
member of the firm is Charles Girdler,  
who, during the past ten years, has  
been associated with L. B. Kerr & Co.,  
and the N. S. Sachs Co.—Hilo Herald.

VOLCANO  
THREATENSStrong Indications  
Of a Coming  
Spurt.GREAT CAVE-IN  
A WEEK AGOFire Visible in the Cracks and  
the Smoke Growing  
Darker.

News from the volcano are encourag-  
ing from the standpoint of those who  
love the lurid in nature. Returning vis-  
itors report rapidly changing conditions  
from day to day and the floor of the  
main crater in places is getting too  
warm to make walking on the lava  
comfortable.

In the vicinity of the lake, at one  
time known as "Clemenson's Delight,"  
which broke out in 1890, the fire has ris-  
en to within a few inches of the floor  
of the crater. In times past one had  
to put a stick down in a crack in order  
to obtain fire. Now it is necessary only  
to lay the stick across the crack and in  
a few seconds it is ablaze.

On Sunday there was a great cave-in  
of the side of the small crater. It  
was said that the roar of the mass in fall-  
ing was deafening. The smoke from  
the crater is growing darker in color,  
an indication that the fire is nearing  
the surface. The odor of sulphur is  
strong. P. R. Helm of Honolulu, who  
was down in the crater last Thursday  
night, reports the scene one of great  
magnificence; fire was visible in the  
cracks and the heat was intense. A  
large party of tourists, including Cap-  
tain A. E. Soule and wife and S. Ku-  
bey and wife, all of Honolulu, left on  
Monday for the crater.—Hilo Herald.

STARS CINCH THEIR  
LEAGUE POSITIONDefeated Maile Ilmas by Bare  
Margin in the Ninth  
Inning.

The Stars took their third game on  
Saturday by defeating the Maile Ilmas  
in a league game at Makiki. The score  
was 22-19.

Quite a large crowd of enthusiasts  
witnessed the play, which was error-  
ful, but interesting. Several of the de-  
cisions of the umpires, Messrs. Gra-  
ham and Wise, were vociferously re-  
ceived by the spectators; indeed, the  
crowd made more noise over some of  
the umpires' decisions than they did  
over the few good plays which punc-  
tuated the game.

Brown twirled for the Constellation  
for five acts, when Babbitt relieved  
him, and occupied the center of the  
stage until the curtain fell. Lemon  
preluded for the basketball play-  
ers for seven innings, and Kekuewa  
pitched the tail end of the comedy.

About the only good play or note  
throughout the afternoon was perpe-  
trated by Hardy of the Mailes, who  
home ran once.

The losers lost in the ninth, failing  
to maintain the supremacy when  
things came to a pinch.

The teams and positions:  
Lemon ..... Pitcher. Brown  
Kekuewa ..... Catcher. Gorman  
Davis ..... First Base. Gorman  
Cockett ..... Second Base. Davis  
Paehaole ..... Third Base. Moore  
Clark ..... Shortstop. Bowers  
Sheldon ..... Right Field. Lishman  
Hardy ..... Center Field. Kiley  
Wright ..... Left Field. Babbitt  
Desha ..... Marcellino

Next week the Artillery will meet the  
Honolulu Athletic Club.  
Following are the results of all  
league games already played:

Stars 18, Artillery 5.  
H. A. C. 11, Maile Ilmas 7.  
Stars 10, Police 5.  
H. A. C. 19, Police 13.  
Artillery 23, Maile Ilmas 22.  
Stars 22, Maile Ilmas 19.

The standing of the league teams to  
date is as follows:

	Won.	Lost.	Pctge.
Stars	3	0	100
H. A. C.	2	0	100
Artillery	1	1	50
Police	0	2	...
Maile Ilmas	0	3	...

## Lessons From the Fire.

The recent fire in Lahaina is a warn-  
ing to Waialuku, and what happened  
there may happen here. We have an  
abundant water supply flowing by our  
doors, but suppose a fire should break  
out in Waialuku, what could we do?  
Even if the citizens should club to-  
gether and buy a hose cart and have  
they would still be no better off than  
the reason that the Board of Public  
Works neglected to put fire hydrants  
in the Waialuku water pipe, people of  
standing the protests of the first funds  
Waialuku. Out of the hose, hydrants  
available for that purpose, and at least  
should at once be put in, and at least  
one hose cart and 1,000 feet of hose  
should be provided.—Maui News.

## Corporation Notices.

## STOCKHOLDERS' MEETING.

THE ANNUAL MEETING OF THE  
stockholders of the Hawaiian Fertilizer  
Co., Ltd., has been called by the Pres-  
ident for Thursday, July 18th, at 8:30  
a. m., in the office of the Hawaiian  
Trust Company.  
J. P. COOKE, Secretary.  
Honolulu, July 6, 1901. 5903

## KIHAI ASSESSMENT NOTICE.

THE THIRTEENTH AND FINAL  
assessment of 5 per cent, or \$2.50 per  
share, on the Kihai Plantation Co.,  
Ltd., stock, has been levied, and will  
become due and payable at the office  
of Alexander and Baldwin, Ltd., on the  
15th day of June, 1901. Interest bear-  
ing after the 15th day of July, 1901.

J. P. COOKE,  
Treas., Kihai Plantation Co., Ltd.  
Honolulu, May 20, 1901. 5861

## MEETING NOTICE.

## LEAHI CHAPTER NO. 2

A MEETING OF THE LEAHI  
Chapter No. 2, O. E. S., will be held at  
the Masonic Temple Monday evening,  
June 15, 1901.

All members are requested to be  
present; also, visiting members in the  
city are cordially invited.  
By order of the W. M.  
I. M. MELANPHY,  
Secretary.

## MEETING NOTICE.

ARMORY COMPANY B, FIRST RE-  
GIMENT, NATIONAL GUARD OF  
HAWAII.

Honolulu, H. T., July 13, 1901.  
MEMBERS OF COMPANY B, N. G.  
H., are hereby ordered to attend com-  
pany muster on Monday at 7:30 p. m.,  
at the Armory. Every member must  
be on hand or accounted for. Uniform,  
fatigue-cap, blouse, white trousers  
and leggings. All company property  
which may now be in possession of  
members, must be accounted for.

## NOTICE OF CO-PARTNERSHIP.

NOTICE IS HEREBY GIVEN THAT  
the undersigned have this day formed  
a copartnership for carrying on the  
liquor business heretofore known under  
the firm name of Camara & Co., as-  
suming all liabilities and collecting all  
debts of said Camara & Co., at our  
new place of business at 35 King  
street, Honolulu.

GOMES & MCTIGHEE,  
J. E. GOMEZ,  
THOS. MCTIGHEE.

## MASTER BUILDERS' ASSOCIATION

THERE WILL BE A MEETING OF  
the Master Builders' Association at  
their rooms in the Elite building at 2  
p. m. today.

W. P. BARRY,  
Secretary pro tem.
